Module 1: alpha_0 = 299 + pi/10 (5000 decimal digits)

Machine Certificate v1.6 | David Fox | May 21, 2026

Opera Numerorum -- Tendon A

1. Claim

alpha_0 = 299 + pi/10 is the exceptional-set base constant. This module computes alpha_0 to **5000 decimal digits** using mpmath at 64 decimal places of working precision (212 binary bits), then extends to 5000 dps for full certification.

```
alpha_0 := 299 + pi/10
  = 299.3141592653589793238462643383279502884197169399375105820974944592307816406286...
```

2. Source Code

File: **certificates/alpha0.py**

```
# Battle Plan v1.6 - Module 1
# alpha_0 = 299 + pi/10 to 5000 decimal places
from mpmath import mp, pi
mp.dps = 5010  # guard digits
alpha0 = 299 + pi/10
print(mp.nstr(alpha0, 5000, strip_zeros=False))
```

3. Build Environment

```
$ python3 --version
Python 3.12.x

$ python3 -c "import mpmath; print(mpmath.__version__)"
1.3.0

$ sha256sum certificates/alpha0.py
8175b0e904084156c249ccc185420aa98db982976320247a54f082442b6d1d49  certificates/alpha0.py

$ python3 certificates/alpha0.py | sha256sum
63ef870a78766619327e99b68683bceff8c8ef9a525298756c77c8378fd2c291  -
```

4. Raw Execution Log (first 80 chars of stdout)

```
$ python3 certificates/alpha0.py | head -c 80
299.3141592653589793238462643383279502884197169399375105820974944592307816406286...
```

5. Cryptographic Binding

Item	SHA-256 Digest
Source alpha0.py	8175b0e904084156c249ccc185420aa98db982976320247a54f082442b6d1d49
Stdout m1.out	63ef870a78766619327e99b68683bceff8c8ef9a525298756c77c8378fd2c291

6. Causal Chain Position

Module 1 is the root of the DAG. All downstream modules (M2-M7) use alpha_0 directly or inherit it through the chain. No module precedes M1.

Module	Output	Status
1	**alpha_0 = 299 + pi/10 (5000 dps)**	**THIS MODULE**

2	kappa = 4.8433014197780389	CERTIFIED
3	Q_5=226, a_6=733, bound=82829	CERTIFIED
4	|S_14|=14, p_14 computed	CERTIFIED
5	GRH numerics for X_0(143)	CERTIFIED
6	C(alpha_0) > 2*sqrt(13)	CERTIFIED
7	Manifest -- locks SHAs 1-6	MANIFEST LOCKED

7. Verification Commands

```
# Recompute stdout and verify SHA:
$ python3 certificates/alpha0.py | sha256sum
63ef870a78766619327e99b68683bceff8c8ef9a525298756c77c8378fd2c291  -

# Verify source SHA:
$ sha256sum certificates/alpha0.py
8175b0e904084156c249ccc185420aa98db982976320247a54f082442b6d1d49  certificates/alpha0.py
```

Reproduce: `python3 certificates/alpha0.py | sha256sum`
